Appearance: Clear/Colorless Solution

Radiochemical Purity: $\geq 95\%$

Radionuclidic Purity: I-131 $\geq 99.9\%$

The ratio of following Radionuclidic impurities I-130, I-133, I-135, other nuclides total $\leq 0.10\%$ of total radioactivity. Certificate of Analysis and Packing Slip to be included with each shipment.

The following questions will enable us to correctly complete your customer profile as well as meet your specific requirements:

Thiosulfate-free I-131 requested: Yes or No

Select vial type and size:

1 mL V-Vial/Crimp Top	
1 mL V-Vial/Screw Top	
2 mL V-Vial/Crimp Top	
3 mL V-Vial/Crimp Top	

2 mL Serum Vial/Crimp Top	
5 mL Serum Vial/Crimp Top	
10 mL Serum Vial/Crimp Top	
20 mL Serum Vial Crimp Top	
20 mL Serum Vial/Screw Top	

Activity Amount Requested: _____ mCi

Concentration Range: _____

Volume requested: _____

Buffer: NaOH

Standard (not available for thiosulfate-free orders).

*Orders are calibrated for the day of requested receipt at 12:00 noon, MST, unless otherwise stipulated. Orders requiring more than 2 days shipping will require additional precal, possibly increasing the price per mCi.
